DATA SHEET TB 20b

BR 20b · PFA-lined Ball Valve DIN and ANSI Version

CE

Applications

Tight-closing PFA-lined ball valve for (highly) corrosive media, especially with high process demands in chemical plants:

- Nominal size DN 15 to DN 200 and NPS½ to NPS8
- Nominal pressure PN 16 and cl150
- Temperature range -40 °C to +200 °C (-40°F to 392°F)

The controlling device consists of a PFA-lined ball valve with a pneumatic quarter-turn actuator, a manual gear or

The valves are designed according to the modular-assembly principle have the following features

- Full bore, high KV values
- Body of EN-JS 1049 (0.7043 / A395) with PFA-liner (min. 3 mm wall thickness)
- Exchangeable PTFE seat rings
- 1 pcs ball/stem of stainless steel (1.4313) with PFA liner (min. 3 mm wall thickness)
- Hysteresis free, perfect for throttling service
- Shaft sealed by a self-adjusting PTFE V-ring packing, supported by disc springs, maintenance-free
- Blowout-proof shaft
- Connecting flange for actuators acc. to DIN ISO 5211
- DIN version with face-to-face dimensions acc. to **DIN FN 558**
- ANSI version with face-to-face dimensions acc. to **ASME B16.10**
- High-quality 2-component PU coating (RAL 1019) as protection against corrosive atmosphere and corrosive formation

Table 1: List of parts

Item	Description						
1	(Main) Body with lining						
2	(Side) Body with lining						
3	Ball with coating						
4	Seat ring						
5	V-ring packing						
6	Stuffing box flange						
7	Bearing bush						
8	Disc spring set						
9	Screw						
10 1)	Screw / stud bolt						
11 1)	Nut						

Item	Description
12	Washer
14	Bush
15	Bush
16	Disc spring
17	Bush
18	Centre ring
19	Lever
20	Control shaft
21	Pin
22	Bearing bush

¹⁾ Depending on the nominal width, stud bolts can be fitted with nuts or screws.

Versions

BR 20b ball valve are optionally available in the following versions:

- Ball valve with lever (DN 15 to 100 or NPS½ to 4)
- Ball valve with manual gear
- Ball valve with pneumatic quarter-turn actuator (see associated data sheet for details)
- Acc. to customer specifications

Special versions

- Valve body made of stainless steel 1.4571
- Ball valve for controlling by characteristic seat ring
- · Variety of material for ball and seat ring
- Lining PFA conductive
- Heating bag, stainless steel
- FDA conform sealing materials
- Ball / Shaft two-piece
- According to customer specifications
- Nominal size DN 200 also available in PN 10

Principle of operation

The BR 20b Ball valves allow full flow through the valve in either directions.

The ball (3) with its cylindrical passage slew around the middle axis.

The opening angle of the ball determines the flow through the free area between the body (1) and bore.

When the ball valve is opened, the entire profile is available.

The ball (3) is sealed by exchangeable seat rings (4). The ball shaft is sealed by a PTFE V-ring packing (5) which is spring supported by disc springs (8) positioned above the packing.

The shaft is equipped with a lever. Optionally, a pneumatic actuator or gear-operated actuator can be assembled.

Fail-safe position

Depending on assembly position of the pneumatic actuator, the valve has two fail-safe positions which become effective when the air pressure in the actuator is relieved or when the supply air fails:

• Ball valve with fail-close actuator:

While air failure, the valve is closed. The valve opens when the signal pressure increases, acting against the force of the springs.

Ball valve with fail-open actuator

While air failure, the valve opens. The valve closes when the signal pressure increases, acting against the force of the springs.

i Note

The ball valve can also be used for control applications. Refer to the data sheet ▶ DB 20a-kd.

i Note

Before using the valve in hazardous areas, check whether this is possible acc. to ATEX 2014/34/EU by referring to the operating instructions ▶ BA 20a.

Optional material combinations

For best adaption to process conditions, it is possible to optimize ball valve by modification of materials (eg. body, shaft, ball and sealing).

Additional accessories

The following accessories are available (separately or in combination):

- · Locking device
- Shaft extension (100 mm, standard)
- Pneumatic or electric quarter-turn actuators
- Positioner
- Limit switches
- Solenoid valves
- · Filter regulator
- Heating bag available for various nominal sizes on request (not for ANSI versions)
- Ball valve for control application by characteristic seat ring

Further accessories are possible on customer request.

Advantages of the live-loaded sealing system

- Maintenance-free and self-adjusting
- Highest tightness, even under extreme pressure and temperature conditions
- · High durability

All in all: Extremely economic!

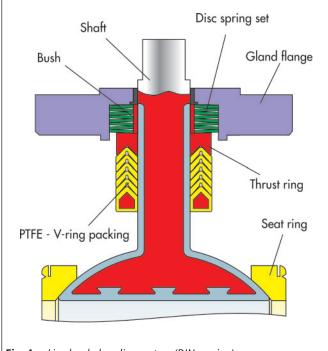

Fig. 4: Live-loaded sealing system (DIN version)

 Table 2: General technical data

	DIN	ANSI					
Nominal size	DN 15 200	NPS½ 8					
Nominal pressure	PN 16	cl150

Packing	PTFE V-ring packing su	oported by disc springs					
Face-to-face dimensions	DIN EN 558 row 1, DN 15 DN 150 DIN EN 558 row 12, DN 200	ASME B16.10 Short Pattern A, NPS½ NPS4 ASME B16.10 Short Pattern B, NPS8					

Table 3: Materials

	DIN	ANSI							
Body	EN-JS 1049 / 0.7043 with PFA-lining (min. 3mm)	A395 with PFA-lining (min. 3mm)							
Ball / Shaft	1.4313 with PFA-c	1.4313 with PFA-casing (min. 3mm)							
Seat rings	M-PTFE								
Packing	PTFE - V-ring-packing								
Disc spring set	1.8159, D	elta Tone							
Bearing bush	PTFE with 2	5 % carbon							
Body sealing	PF	FA							
Paint coating	Two-component polyureth	nane, grey beige, RAL 1019							

Table 4: kvs and Cv coefficients

DN	15	25	40	50	80	100	150	200
NPS	1/2	1	11/2	2	3	4	6	8
kvs	10	45	105	163	402	587	1554	2670
Cv	12	52	122	190	467	682	1810	3111

Table 5: Operating and breakaway torques

Differential	pressure		Δp in bar	0	5	10	16		
DN	NPS	Perm. oper- ating torque MDmax. in Nm	Req. operat- ing torque Md in Nm	Breakaway torque Mdl in Nm					
15	1/2	126	6	10	10	10	16		
25	1	140	6	10	12	14	17		
40	1½	140	12	20	22	24	29		
50	2	140	17	30	32	34	39		
80	3	608	44	74	80	86	101		
100	-	833	70	120	128	136	154		
150	-	1570	210	300	380	450	540		
200	-	6515	270	380	430	505	570		

The above listed torques are based on the opening of the ball valve at the differential pressure for water with corrosion inhibitors added at room temperature and with one-day non-actuation.

Since temperature, pressure, process medium, switching frequencies and idle times considerably affect the arising torques, corresponding factors need to be taken into consideration on selecting and sizing the actuator. In case of doubt, contact Pfeiffer.

The listed maximum permissible torques apply to the standard material listed in Table 3.

Pressure-temperature diagram

The operating range is given by the pressure-temperature diagram. Process data and medium may influence the values in the diagram.

Body material: EN-JS 1049 (DIN EN 1092-2)

Sealing ring material: PTFE

Table 6: Pressure-temperature values

) °C	-4	Standard
------	----	----------

Nominal															
pressure	Nominal Size	-40	-20	0	20	40	60	80	100	120	140	160	180	200

Selection and sizing of the ball valve

- 1. Determine the required nominal size
- 2. Select valve in accordance with table 2 and 3 and by pressure-temperature diagram
- 3. Select the appropriate actuator using table 5
- 4. Select additional equipment
