TROVIS **SMART** APPS

Convenient Access to Smart Controllers

SMART IN FLOW CONTROL.

FOR PRIVATE END USERS

TROVIS55HOME is designed especially for private end users and home owners. This app focuses on the essential features:

Simple operation in local networks

- **Organize information**
Customize your home screen to display the most important information.
- **Manage times-of-use**
Set times-of-use for individual days of the week or blocks of days (Mon to Fri, Sat to Sun).
- **Adapt set points to your daily routine**
Conveniently adjust the temperature from the couch without having to get up and walk to the controller.

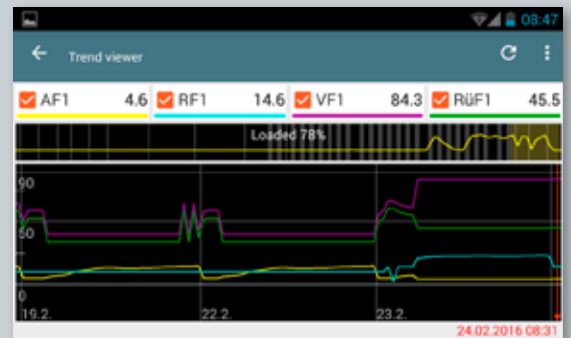

FOR TECHNICIANS AND ENGINEERS

TROVIS 55Pro is designed for technicians and engineers. The app enables them to monitor and operate several systems.

Benefits:

- Monitor several controllers at a glance
- Customize plant names
- Fault management
- Manual override
- Show historical data
- Save and load controller configurations
- Customize how data points are arranged
- View the most important operating data from several systems

TYPES OF CONNECTION

Connection of the TROVIS 5573 and TROVIS 5578 Heating and District Heating Controllers is easy: use the Modbus TCP gateway and a free Ethernet port on your wireless router at home or connect the controller using a Bluetooth module.

Using a wireless network and existing router:

- TROVIS 55Home/55Pro
- Modbus TCP gateway
- TROVIS heating controllers
- AES encryption

Or using Bluetooth over short distances:

- TROVIS 55Pro
- Bluetooth module
- TROVIS heating controllers

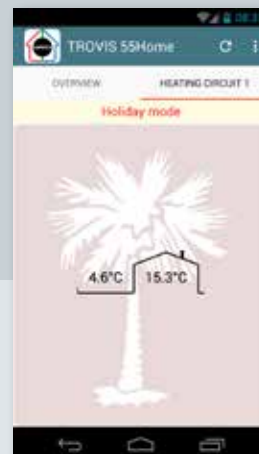

REMOTE CONTROL

TROVIS 55HOME serves as an easy-to-use remote control.

- **Change operating modes**
Adjust the controller to meet your heating needs in real time whenever and from wherever you want.
- **Read consumption (heat meter) data**
Adapt the current room set points when consumption is high.
- **Check fault indicators from remote locations**
Detect faults at an early stage and respond as required.
- **Control your holidays**
The app is also ideally suited for holiday homes and buildings only used during certain seasons.
